

Quick Tips for Student Remote Learning Tech Connection

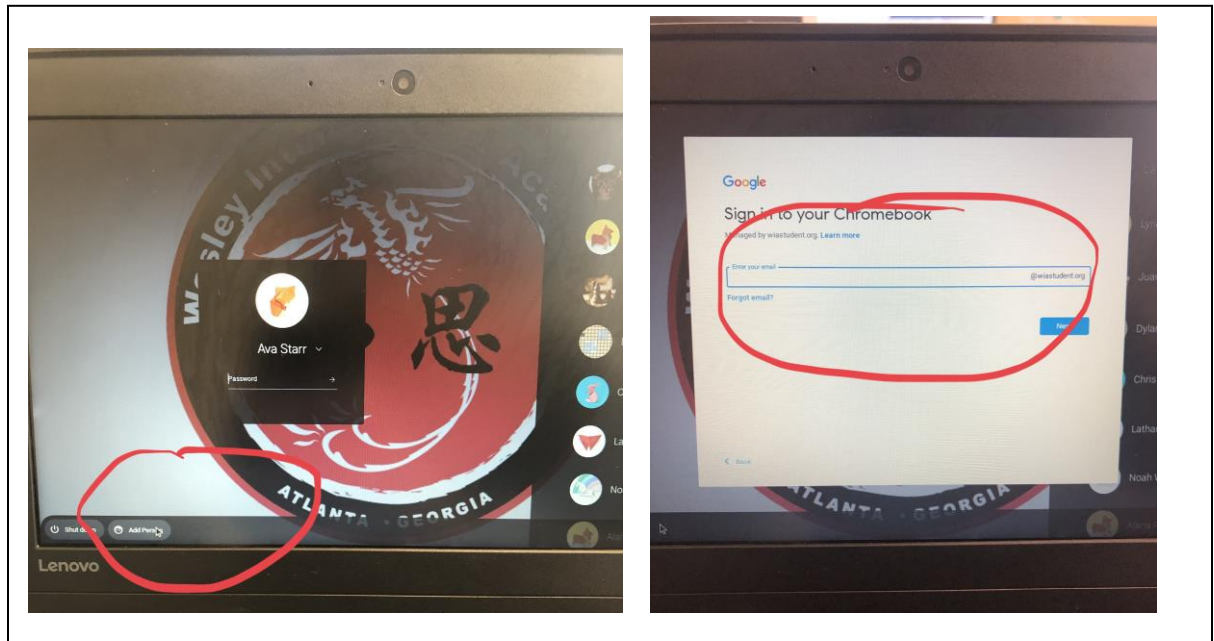

Do I need a school issued laptop to complete the assigned online work?

No, you can use any laptop or device which can connect to the internet.

I was issued a school laptop but cant log into it, there is a list of student names on the laptop but don't see mine.

The laptop issued may not be the same your student uses while in school, that would be the reason you don't see their name.

You can select 'Add Person' from the bottom left corner of the screen and enter your students Google login information.

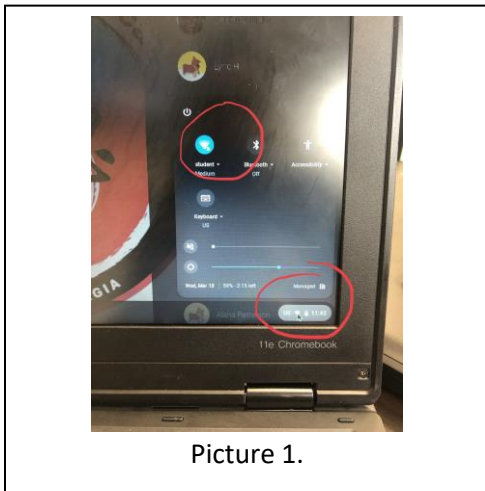

My student does not know their Google login.

Please contact your students teacher for assistance.

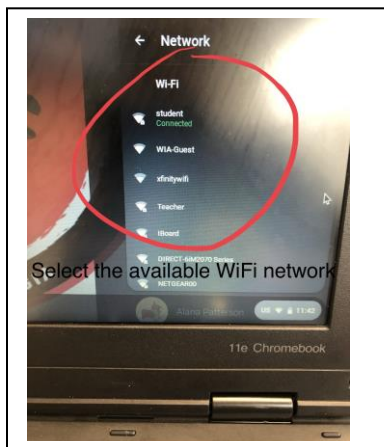

Im having trouble connecting to the school issued laptop to the internet.

You can connect the laptop to your home WiFi network by following these steps.

- 1) Click on the WiFi signal icon located in lower right corner of the screen.
- 2) In the pop up, Click on the blue icon where it says 'student', this will bring up a screen showing any available WiFi connections (You Home WiFi). (See Picture 1).

- 3) Next, select your WiFi from the available connections. For your home network you will need to know the password you have set. If your not aware of your home WiFi network password, please contact your internet service provider.

I was issued an internet Hot Spot by the school but having trouble connecting.

This issue can be easily resolved by resetting the WIA issued internet hot spot.
